

BANGCHAK BRAKE DOT 3

Fluids for Brake and Clutch Systems

BANGCHAK BRAKE DOT 3 is a brake fluid for use in all type of brake and hydraulic clutch system. The boiling point is above 400 °F. The FEATURESs are :

- o Increased safety through minimized drop in boiling point.
- o Will not damage the rubber components and corrode the metal parts in the brake system.
- o Fully compatible and miscible with other brake fluids of similar specification.

MEET REQUIREMENT

- o FMVSS NO 116 GRADE DOT 3
- o SAE J-1703

APPLICATION

BANGCHAK BRAKE DOT 3 is suitable for passenger car, truck, bus and motorcycles.

FEATURES & BENEFITS

Brake Shield

Steady Boiling Point

TYPICAL INSPECTION

PROPERTIES	METHOD	BRAKE DOT 3
Color, ASTM		L.1.0
Eq. Reflux Boiling Point, °C	SAE J 1703	205 Min
Wet Boiling Point, °C	SAE J 1703	140 Min
pH	SAE J 1703	7.00-11.5
Density, g/cm ³	SAE J 1703	1.010-1.055
Viscosity @ 100 °C, cSt.	SAE J 1703	1.5 Min

Packaging : 200 Litre
